

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

April 30, 2003 LB 798

Select, and then on Select revisit it. Thank you.

SENATOR SCHIMEK: Thank you, Senator Preister. (Visitors introduced.) Senator Beutler, you are the next speaker.

SENATOR BEUTLER: Senator Schimek, members of the Legislature, I just wanted to talk about and clarify a couple things with regard to the Cash Reserve Fund. The Appropriations Committee has been very cautious with regard to the Cash Reserve Fund, and the Cash Reserve Fund that we're talking about here is what we also call the rainy day fund, which is a fund in excess of the basic Cash Reserve Fund, which is a 3 percent fund. But if I'm remembering correctly, there have only been two things that have been taken out of the Cash Reserve Fund. One is the vets' home, and that was done at the behest of the Governor, and the other was this matter which became necessary, if I'm remembering correctly, Senator Jensen, because the Governor took \$3 million in the past away from that cause in order to put it into the General Fund, if I'm remembering correctly. Can you verify that?

SENATOR SCHIMEK: Senator Jensen.

SENATOR JENSEN: Yes, and for those who were here a couple years ago, when we went into special session where we zapped all the funds that were available and we were able to get by that year without a tax increase or anything, or at least that session, well, this \$7 million a year, the first year, took awhile to get up and running. We didn't want to throw money out there until we had the programs all set up, and so there was some dollars that were unspent and the Governor took those funds, just like he drained the funds from all of the other programs that were around there. So that...and that was, if I recall, around \$3 million that shorted this fund, and I guess maybe that's where the \$3 million then come from here. I certainly would recommend that we do as Senator Preister had mentioned, that we not delay this bill that we might look at this before Select File. But also, when people look at Nebraska and see, well, what...you've got all this money coming in from the master settlement agreement, what are you using it for; are you using it for any tobacco cessation or programs or to help people quit
